## Western Migrating Tanager Lark

1. *Journal of the American Medical Association*, 1997; 277: 1033-1038.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971). The concentration of chlorophylls was expressed as  $\mu\text{g mL}^{-1}$  of the sample.

Figure 1 illustrates the experimental setup. A participant is seated at a table, looking at a video screen. A camera is positioned above the screen. A horizontal bar is placed between the participant and the screen. The screen displays a target (a small circle) and a starting point (a small circle). The participant's hand is positioned at the starting point. The diagram is labeled with 'Participant', 'Video Screen', 'Camera', 'Horizontal Bar', 'Target', and 'Starting Point'.

The Council shall be composed of representatives of the member states, elected by the national parliaments, and shall be assisted by a secretariat. The Council shall meet at least once a year. The Council shall be assisted by a secretariat. The Council shall be assisted by a secretariat.

# Please! Do Not Lend Your CITY DIRECTORY

## IT COSTS YOU MONEY Every Time It Is Lended

The practice of lending your City Directory, is a great expense is responsible for the increasing cost of Directors Service.

The reason is:-

There is a definite cost involved in the making of the Directory of Your City.

This cost must be absorbed by the subscribers—or they would be charged 1000.

If every man had his Member to the City Directory—the the subscriber would of course have to absorb the Whole Cost.

If there were 1000 subscribers—each one would have to absorb 1000 part of the Whole Cost.

From which it is obvious that the Greater the number of subscribers the Greater the cost to each.

Every time you lend your City Directory the Less Economy There is for the Borrower to subscribe for the Service.

More Borrowers cost is More Subscribers, which means Increased Costs.
